Programming Fundamentals – Nested Loops Worksheet

July 9, 2026

1. Print a Square Pattern

Write a program to print a 5 × 5 square using the * symbol.

2. Multiplication Table

Write a program to display the multiplication tables from 1 to 5.

3. Number Grid

Write a program to print a 4 × 4 grid containing the numbers 1 to 4 on each row.

4. Right Triangle Pattern

Write a program to print a right triangle using * with 5 rows.

5. Classroom Seating Plan

A classroom has 6 rows and each row has 5 desks. Display the seating arrangement as: Row 1: Desk1 Desk2 Desk3 Desk4 Desk5.

6. Ice Cream Shop

An ice cream shop has 4 freezers. Each freezer contains 6 ice cream boxes. Each box contains 20 ice creams.
Calculate:

- Total number of ice cream boxes.
- Total number of ice creams in the shop.

7. School Examination

A school has 5 classrooms. Each classroom has 25 students. Each student pays Rs. 500 as the examination fee.
Calculate:

- Total number of students.
- Total examination fee collected.

8. Orange Farm

An orange farm has 8 trees. Each tree produces 35 oranges.
Calculate the total number of oranges harvested.

9. Hotel Rooms

A hotel has 6 floors. Each floor has 18 rooms. Each room costs Rs. 12,000 per night. Assume every room is occupied.
Calculate:

- Total number of rooms.
- Total income for one night.

10. Airline Passengers

An airline operates 5 flights. Each flight has 30 rows and each row has 6 seats. Assume every seat is occupied.
Calculate:

- Number of passengers on one flight.
- Total number of passengers on all flights.
